RE: APPLICATION FOR THE SUPPLIES OF 30 COMPUTERS

Please find the subject matter mentioned above. Maurice secondary school is a private school established in 2003. and registered in 2004 no. with Reg.no. 1365

School offers secondary education for ordinary level and A level programs, currently school have 300 students for O level including 100 who coming from poor family trained under special programme with low cost.

School has got computer programme but yet it is not in operation because of lack of computers, as anew school with very minimal resources it has become very difficult to get enough money to acquire computers.

We have a great honour to submit our request to your organisation so that we can help those students to undergo computer knowledge and skill..

It is our hope that you will consider our application for the betterment of the students and the national at large.

Thanks

Yours faithfully.

Sheddy M.maurice
Director of Finance and Development
